Why choose Oracle Cloud Infrastructure?

High performance at a lower price

Transparent pricing: no data egress fees or escalation for classified workloads

The full cloud where and how you need it

Everything Everywhere[®]: offering the same services as public cloud

Simple, prescriptive, integrated security

Built-in security that's always on by default to meet Zero Trust requirements

AI embedded across the tech stack

Leverage open source or proprietary LLMs fine-tuned with your own data

Powerful sovereign AI infrastructure

A better value, from a single VM to a 65,000 GPU cluster

Core-to-Edge capabilities

Deploy workloads at the edge of networks on Roving Edge Infrastructure
